What MS Golddust has to offer you more than other products?

- An optimal absorption of moisture of 150%. 1 kg of MS Golddust absorbs 1,5 liters of moisture. This means dry, but **not** to dry
- Ammonia binding by moisture absorption of Kaolin and Yucca. Thus an **even better** absorption of Ammonia.
- A pH which is adapted to the acidity of the skin. Thus **no** irritation of the skin
- Vegetable aids prevent crusting. Thus **no hard crusts** on the Floor or in the lying box
- A particle size which minimizes dusting. Thus **no** nuisance when scattering
- A combination of 3 special oils. Thus offering a **lasting** pleasant climate
- Vegetable and mineral ingredients known from food and cosmetic applications. Thus **no** problems when intake by animals, like throat burning
- Contains no chlorine. Thus **no** skin irritation and/or product contamination (milk)
- Contains high level of seaweed. Thus **stimulating** decomposition in the dung pit

MS Golddust: Not just a hygiene powder!

MS Golddust is a composed product in which all the ingredients fulfill their Unique task. Not just simple absorbing of moisture, but far more than that

Too often hygiene powders are just seen useful just. "as long as it absorbs moisture". This is the statement often repeated. Reality is different And other conditions now have to be fulfilled Absorption of moisture is very important, but certainly not the only thing what counts **MS Golddust** has been tested very thoroughly. It does not give any substitutes when Taken in by the body. It has been dermatological tested and clearly shows its compatibility with the skin. It is as good as sterile and free of heavy metals. It contains vegetable aids which prevent crusting, absorb moisture and Ammonia and are even able to repel insects. The absorption of 150% has been chosen very carefully in order to reach an optimum of dry climate, skin compatibility and application.

In short: MS Golddust is a very well balanced product fulfilling all requirements of a professional hygiene powder. The end result is a peaceful, comfortable and healthy climate. This is one of the conditions for top performance of your animals

**MS Golddust;
The crossing where
hygiene, comfort,
climate and health
meet**
